When you want the best care for your pets, who should you choose?

Everywhere you look there's a new website or app advertising pet sitters and dog walkers, with profiles of people who love pets and are looking to earn extra cash.
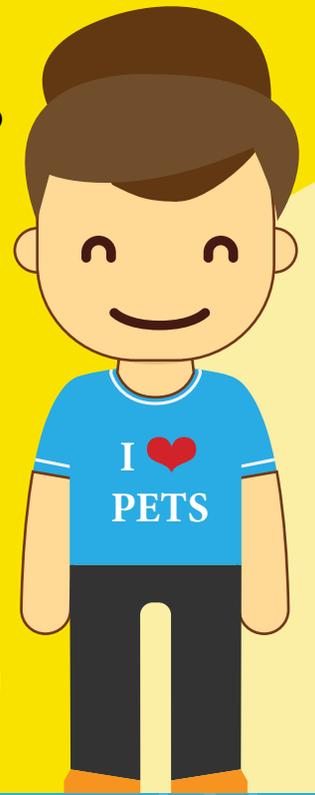

So, who can a pet owner trust?

Pet owners who want the best care for their best friends choose PROFESSIONALS.

Professional Pet Sitter vs. Hobby Pet Sitter

Professional Pet Sitter

- ★ has a local business license, if required
- ★ has his or her own business insurance & bonding
- ★ asks clients to complete a service contract
- ★ has pet-care training and/or Certified Professional Pet Sitter (CPPS®) designation
- ★ offers pet sitting or dog walking as a primary business—your pets are his or her priority, and career!

Hobby Pet Sitter

- • is not an actual business-usually simply posts on a "pet sitters" website or app
- • may not have any insurance coverage, or has limited coverage under a listing service
- • asks pet owners to email quick details about pets only
- • may love pets, but has not pursued ongoing education or certifications related to pet care
- • offers pet care as a side gig or way to earn extra money and is not pursuing a career in pet sitting.

I ♥ PETS

When you need a professional pet sitter or dog walker, look for the PSI member logo.

PSI
Pet Sitters
international
MEMBER

Pet Sitters International (PSI) has been the most trusted name in professional pet sitting for more than two decades—and PSI members have access to the best business tools and educational resources, including:

- ★ Pet-sitter insurance & bonding
- ★ Service contract & business forms
- ★ Industry's top educational offerings, including the CPPS® Program
- ★ Support of the largest network of professional pet sitters and dog walkers in the world

Their membership enables them to provide the most safe, reliable and quality care to your dog, cat, parakeet, horse—or anything in between!

When your pets need care while work or travel keep you away, look to the PROS—the professional pet sitters and dog walkers of PSI.
